

General Operatives (Manufacturing)

Tracking Code

495-086

JOB DESCRIPTION

We currently have opportunities for Production Operatives in our Manufacturing Facility. Reporting to the Team Leader and Value Stream Manager, general duties will include the operation of a fully automated high output production facility in both production and packaging areas.

All General Operatives work on a shift basis, 2 weeks of nights and 2 weeks of days.

DUTIES AND RESPONSIBILITIES

- Operation of high speed continuous bread production line, packaging and process equipment.
- Regular QC checks must be completed, including metal detector tests, sample counts, temperature and other process checks as required.
- Operators will also be required to clean the production line “as they go” and to fully clean the production line on clean down days.
- Documenting QC checks on a regular basis.
- Maintaining the required hygiene, safety and quality standards on the production floor.
- Keeping a working stock of raw materials required on line at all times.
- Liaise with appropriate staff throughout the shift to ensure continuous process and quality standards.
- Ensure that a clean & safe workplace is maintained at all times.
- Operate and monitor machinery which palletizes finished products as required.
- Data entry of production data into management reporting system as required.
- Operate forklift and manual lifting as required.
- Participate in projects as required, i.e. continuous improvement, health & Safety, hygiene and quality.
- Other ad hoc duties as required.

Skills & Qualifications Required:

- Previous line experience in manufacturing environment.
- Mechanical aptitude.
- Likes to assume variety of responsibilities in team based production environment.
- Excellent communication skills.
- A competent level of written & spoken English is essential.
- PC Literate
